Fordson Farm Tractor

Winter or bad weather does not hinder the Fordson's usefulness. There is always some job—drawbar or belt—that the Fordson will do more quickly, more efficiently and with a small consumption of fuel. Besides it solves the labor problem.

Day or night—twenty-four hours a day if you choose—you can utilize the Fordson. Like the machines in the factories, the Fordson furnishes power that is always ready for use—a power that means a saving in labor and time. And for that reason the Fordson is a money maker.

Back of the Fordson is the Fordson service organization—Fordson repairmen and stocks of extra parts—are always convenient and insure you continuous use of your tractor.

Don't delay ordering your Fordson. Only so many are allotted this territory and orders are filled in rotation. Let us have your order now; we will give it prompt attention.
